

## LOGIX SEMI-AUTOMATIC STRAPPING MACHINE

EXS-306

Reduce your labour and energy when it comes to your strapping. No need for clips, tensioners or sealers, the EXS-306 replaces all of those functions. All that is required is a person to take the outgoing strap, circle the package and feed the flap back into the machine to finish the entire operation. It boasts a constant strapping tension and an overall faster process to get all your strapping done with a minimum amount of fuss. Comfortable working height of 730mm (28.75").

**Min. package size:** 60mm
